Summary

I am actively involved in web development, utilising tools such as React, Vue and Tailwind CSS to create responsive and interactive websites. I am also committed to providing exceptional customer service and building strong client relationships, ensuring their satisfaction and loyalty. Passionate and motivated, I am always eager to learn new technologies and techniques and to collaborate with other professionals in the field.

Experience

Junior Frontend Developer at Numiko

November 2023 -

At Numiko, I specialised in developing and enhancing web solutions for high-profile clients using a diverse tech stack including Drupal, Twig, TailwindCSS, SCSS, Vue.js, and JavaScript. Key responsibilities and achievements included:

- Developed critical website features based on stakeholder requirements and user feedback
- Ensured WCAG accessibility compliance and cross-browser compatibility
- Collaborated with cross-functional teams to deliver impactful website improvements
- Implemented version control and code review processes to maintain high code quality
- Translated brand guidelines into functional, visually appealing web elements

- Utilised modern web technologies to optimise site performance and user experience

This role demanded a blend of technical expertise, creative problem-solving, and effective collaboration to deliver user-centric web solutions that met client needs and industry standards.

Frontend Developer at Meeow Online Networking

September 2023 - November 2023

- Developing front-end interfaces for Meeow's website using Vue.js, Nuxt.js and Tailwind CSS based on provided Figma designs.
- Working closely with lead designer to implement responsive page layouts and components.

Freelance Frontend Developer at DesignRise Ltd. UK

January 2023 - November 2023

Languages Teacher at Carlton Bolling College

September 2016 - November 2022

Ecommerce Executive at DANIEL FOOTWEAR LIMITED

September 2014 - August 2016

Graphic Designer at Enjoy design agency

January 2013 - August 2013

Education

edX Trilogy skills in Front-end Web development Bootcamp Front-end Web-development Bootcamp, October 2022 - March 2023

The edX Trilogy Skills Bootcamp in Front-End Web Development provided comprehensive training in key skills for building interactive websites. I gained expertise in HTML, CSS, and JavaScript, creating responsive designs and ensuring optimal user experiences across devices. The bootcamp covered version control using Git, debugging, and testing web applications. I also learned popular frameworks like React for building dynamic interfaces. The bootcamp enhanced my collaboration, communication, and adaptability in front-end development.

The University of Sheffield

PGCE in Modern Foreign Languages, Education, September 2016 - September 2017

I hold a PGCE in Modern Foreign Languages from Sheffield Hallam University, where I developed strong language skills in French and Spanish. Alongside my language studies, I have also pursued a passion for web design and front-end development. With a focus on user-centric design and creating visually appealing websites, I continually expand my knowledge and skills in HTML, CSS, JavaScript, and responsive design. Committed to delivering exceptional web experiences, I combine my creative problem-solving abilities with my language fluency to create engaging multilingual websites.

Northumbria University

Bachelor's degree, Design for Industry, September 2010 - July 2014

The Design for Industry BA (Hons) at Northumbria University is a comprehensive course that fosters a critical, analytical, and creative approach to designing products, services, and experiences. The course combines industry-run projects with academic learning, ensuring that I developed the skills necessary to make a significant contribution to the field of professional industrial design practice. The curriculum is responsive to current industrial design practices and promotes a learning environment that supports creative approaches to research, iterative practice-based activities, and the use of new and emerging technologies. A highlight of my time in the course was the opportunity to study at Strate College of Design in Paris and complete a year-long internship at Enjoy Design in Paris, where I was able to apply the skills and knowledge I gained during the course in a real-world setting.

Leeds Arts University

Foundation degree, Industrial and Product Design, September 2008 - July 2009

The Foundation Diploma in Art and Design at Leeds Arts University is a well-respected and nationally recognized qualification. This intensive one-year course challenged my preconceptions and stretched my art and design practices through problem-solving,

idea generation, and critical thinking. The course pushed me outside my comfort zone, encouraging me to take creative risks and learn through playful experimentation. I developed lateral-thinking strategies to approach problems from new perspectives. The course gradually moved from wide-ranging staff-led projects to a position of independence, culminating in a significant individual project in the final stage. Drawing, in its many forms, underpinned all course elements, and I was encouraged to become more inventive and experimental within this intensively creative environment.
